

Torrent Waterproofing through our founder has over 30 years of experience waterproofing all inverted roof systems, building foundations, elevator pits, ventilation shafts and all decking applications. Although waterproofing is seldom visible but yet an integral part of the buildings foundation, Torrent with its various types of waterproofing systems available and over 30 years of unique waterproofing experience and knowledge, can recommend and implement the waterproofing system ideally suited to your building requirements and financial needs. We are able to be a part of the entire ground breaking process to the completion of any of your projects. Our service leadership skills, superior quality, advanced technology and highly skilled workforce, will enable us to become the forefront within the industry and our reputation will follow our successes. Our company's strategy and philosophy for your investment, is to build a service model that is engineered for growth, productivity and profitability. We at Torrent Waterproofing are committed to ensuring there is continued coaching and development, in-order to guarantee we have the best skilled and motivated workforce, which will be focused on delivering optimum results and achieving the highest possible standards to your company's investment.

Torrent Waterproofing will surpass our customer's expectations by offering exemplary service and adhering to strict time lines, while building relationships and continued loyalty within the Residential, Commercial and Institutional Community.

Torrent Waterproofing services include the following:

- Hot rubberized waterproofing membrane.
- All inverted roofing systems, from green to patio stones and gravel applications.
- Basement waterproofing.
- Blue skin applications (is a different waterproofing application that is widely used for commercial structures).
- Voltex and drainage board applications for foundation walls.
- Cold applied elastomeric waterproofing, including water holding tanks and confined spaces.
- Horizontal decks over parking garages, balconies and other living spaces.
- Dampproofing.
- Mastic asphalt traffic topping repairs.
- Specialty products such as cementitious coatings (ex: elevator pits and ventilation shafts).
- All drainage board applications.
- MiraDRAIN®.
- Custom sheet metal and standard finished flashing installation.

Our company will provide dedicated work crews that deliver outstanding results from a new construction build to repairs to existing structures. Our commitment to safety of our employees is paramount. We will provide a safe environment and ensure best practices are met at every level, this includes our supervisors directly or subcontracted workers. We will ensure that our employees have the knowledge, the training and experience to be able to perform all tasks in the safest environment possible. All supervisors are fully equipped and trained to recognize potential hazards of the job and understand the safety standards and regulations that apply to their work. All employees are required in all levels of the company to adhere to the Ontario's Occupational Health and Safety Act and its regulations for construction projects as well as abiding by our own corporate Health and Safety procedures. Our associates will go through extensive on-going training based on their functions from site-specific WHIMIS training, equipment and hazard training, and first aid CPR. Our priority is safety first and maintaining a healthy and safe environment. We also have employees trained in WHIMIS, Basics of supervising, Confined space, Elevated platforms, Fall arrest, Fire extinguisher use, Health and Safety Rep, PPE, Propane, Sector specific hazards, St. John's ambulance (First Aid / CPR), traffic control, WSIB coverage and we are fully insured. Many of these training and development sessions are available with our affiliation through the Local 506 Union.
